Budget

NOV - 8 1957

The Comptroller
Central Intelligence Agency
Washington 25, D. C.

Attention: Budget Director

Dear Sir:

As a result of a conversation on Friday, November 1, between Director Wirth of this Service and Colonel White of your Agency, it was agreed that this Service would provide an additional amount of \$1,063,600 estimated to be required to complete that section of the George Washington Memorial Parkway between Spout Run and the headquarters site of your Agency near Langley, Virginia.

Colonel White stated that in order to defray a portion of the additional amount required, the unused balances of funds appropriated for rights-of-way acquisition for this project could be applied to construction costs. It is our understanding that of the \$500,000 provided for land acquisition costs, \$320,000 was transferred to the National Capital Planning Commission, leaving \$180,000 on the books of your Agency. We have determined that the National Capital Planning Commission will have savings of about \$35,000 which can be made available for construction purposes. They are taking steps to return to your Agency any balances which may not be needed. It will be appreciated if you will in turn allocate to this Service the \$180,000 available to you, in addition to the balance being returned by the National Capital Planning Commission, to be applied to the construction project.

Thank you for your continued cooperation in carrying out this project.

Sincerely yours,

Jackman S. Price
ACTING Director
